

Model 9400

Point-of-Care Arm

LIBERATE
YOUR
DESKTOP

The 9400 Point-of-Care Arm maximizes the flexibility of space-challenged healthcare environments. This huge arm extends almost six feet, enabling it to be mounted behind a bed while still extending far enough for patient or caregiver use. The dual arms fold upwards, minimizing the consumption of valuable horizontal space. Special features include completely internal cable management, durable, heavy-duty construction, and remarkably smooth motion. The 9400 Point-of-Care Arm is an ideal solution for patient rooms, clinics, dental offices... anywhere a monitor is needed (but just some of the time).

FEATURES

- ▲ Over 65" (165 cm) of horizontal extension
- ▲ Supports monitors up to 18 lbs (8.2 kg)
- ▲ Dual arms enable effortless repositioning of monitor
- ▲ Rotate monitor up to 340 degrees
- ▲ Arms fold up for minimal space consumption
- ▲ Internal cable management

Arm collapses to save space

Reposition monitor with effortlessly smooth adjustment

Tilt monitor to desired angle
