

Model 7520

Data Entry Arm

Model 7520 is a robust, height-adjustable data entry arm perfect for multiple-user computer stations. The arm suspends the monitor and keyboard anywhere the user positions it – with fingertip adjustment of height. Monitor and keyboard tray angle are independently adjustable. The arm will fold back on itself to conserve space when not in use.

The arm features internal cable management, keeping cables out of view and out of harm's way.

The arm is available with Innovative's FLEXmount™ offering multiple mounting options (desk/counter clamp, through-desk, grommet and wall), or with a dedicated wall mount.

FEATURES

- ▲ Independently pivot monitor and keyboard platform
- ▲ Effortlessly reposition arm to desired position and height – ideal for multiple-user data entry stations
- ▲ Internal cable management
- ▲ Select from mounting options including FLEXmount™ and dedicated wall mount
- ▲ Select from various keyboard platform options

Instant height adjustment

Independent monitor and keyboard tilt

Cable management routes cables inside the arm
