

Model 9450

Wall Mounted Point-of-Care Arm

The 9450 Point-of-Care Arm allows you to maximize the versatility and flexibility of healthcare environments. This huge arm is mounted high on the wall, extending down into the area of use. This approach saves valuable counter and floor space.

The dual arms fold back, minimizing the consumption of valuable horizontal space. Special features include internal cable management, durable, heavy-duty construction, and remarkably smooth motion.

The arm includes a heavy-duty wall-mount with cable management.

The 9450 Point-of-Care Arm is an ideal solution for patient rooms, clinics, dental offices... anywhere a monitor is needed.
