

## A GREAT ALTERNATIVE FOR THE HEALTHY WORKFORCE

The Workrite Sierra HXL Crank is engineered to enable manual adjustability requiring minimal amounts of human force, making it a good alternative for the healthy workforce or for areas where frequent adjustments are not required.

The HXL Crank adjusts from 25.5" – 43" and will accommodate the average male or female worker, making it a good solution for companies seeking limited height adjustability. It adjusts at a rate of 5.6 turns per inch even with up to 125 pounds of equipment on the worksurface.

Sierra HXL Crank is available in silver with two foot design options that can be selected to build the best workcenter for each specific application.

Easily raise height 1" for every 5.2 turns.
