Natural way to energize your work day.

The human body is meant to stay in motion and the Stance Move helps provide that motion throughout your workday. Forward sloped sitting, kneeling and assisted standing are all healthy postures that provide the worker with unparalleled well-being and energy in the workplace. The Stance Move is the only ergonomic, sit to stand 3 position chair on the market that helps you achieve these positions and more!

When you must sit, sit healthy! The Stance Move provides the user with a backless seating design that helps build balance and core muscles while providing hours of comfortable use.

The Stance Move can also transform into a kneeling chair with one touch of a lever. Kneeling is a very comfortable and healthy workplace posture that is recommended by many doctors and chiropractors

Assisted standing is the posture that really sets the Stance Move apart from all other chairs. Standing unassisted for prolonged periods of time can cause fatigue and muscle soreness. Assisted standing in the Stance Move will allow the user to stand comfortably for hours at a time in the workplace providing good posture, energy, and well-being.
