

the classic-professional stool

CL35

Versatile back design provides optimum back support, body side support or even abdomen support. 8" cylinder allows 25" to 33" seat-height adjustment. Features an elevated column base with footrest for extra sturdiness and ease of use.

(CLVS only)

work high or down low – Forward angle supports you as you work

CL47

The CL47 is a stool that features a knobless, turn-lock footing that easily adjusts to multiple heights and yet stays snugly in place. Perfect for bank tellers due to its compact size and comfortable cushions.

CL22

The CL22 features a unique back design that serves as back support, body side support, or even abdomen support. Simple adjustments make this uncomplicated chair a good choice for many healthcare environments.

the workstools collection

WS15

Sit/Stand Stool lets you sit while standing and alleviates stress points on lower back. Seat tilts up to 20°. A workstool that works for you all day long.

(WS15 only)

sit or stand – dual positioning. Ergonomically designed to support you while you work. Move effortlessly from sitting to standing to leaning back.

WS12

Has all the benefits of the WS10, plus tilting mechanism that tilts seat up to 20°. Pneumatic lift lowers chair for optimal tasking.

WS10

Alleviates strain on back, hips and legs and allows mobility without stressful bending. Pneumatic lift adjusts seat height with fingertip ease.

WS11

All the features of the WS10 but with the added benefit of a built-in sectional tool tray that keeps everything handy.

improved seat design!

Workstool models WS10, WS11, WS12 and WS15 feature a wider, ergonomically contoured seat that conforms to your body, providing comfortable support as you work. As you angle the seat forward for specific tasks, the grooves on top of the seat help prevent you from sliding off. An indentation on the back of the backrest serves as a handle, allowing you to easily move the stool to a different work area. Ideal for industrial environments, the seat is made from easy-to-clean, stain- and puncture-resistant polyurethane.

caster choices

Soft casters. Two-toned. Usable on wood, tile, linoleum and smooth surfaces. Reduces surface marking.

Glide. Black. Fits any chair or stool. 2" high.

Single wheel rubber casters. For hard concrete surfaces or "rough" floors.

Self-braking safety casters. Black. Restricted rolling when user is not seated. Recommended for carpeted floors only.

Reverse-braking casters lock when user is seated. Usable on wood, tile and concrete surfaces.

the workstools collection

WS23*

High-posture stool adjusts seat height 22"-32". Same features as WS22 plus 20" footing for added support and mobility.

WS22*

Pneumatic lift, pivot backrest, and back adjustments articulate stress-free movement. Ribbed seats contour for comfort and prevent slippage.

WS24*

Low-posture stool's tilting backrest and tilting seat conform to your preferred posture, maximizing work performance and minimizing fatigue.

WS25*

High-posture stool has the same versatile features as the WS24 plus 22"-32" seat-height adjustability and 20" footing to support feet and total body.

perfect for industrial workplaces

All of our stools are ergonomically designed for cashiers, dentists, filing clerks, and workers in assembly lines, job shops, and a wide range of other industrial environments. Each model adjusts easily for maximum freedom of movement, reducing fatigue and increasing productivity.

special information

Office Master Workstools are made from puncture-resistant black polyurethane and come with seven-year limited warranties and your choice of BC arms, 5 types of casters, and a tool tray option.

TLTRAY

Tool tray (sold separately) allows easy access to tools and supplies.

* WS22-WS25 have the same seat and back design, and all come with BC arm options.

the classic-professional stool

CL12

16" seat with pneumatic lift raises to individualized comfort level. Unique circle ring enables user to adjust the seat height from any angle.

CL13

Features include height-adjusting circle ring, 16" seat with pneumatic lift, adjustable footring and optional 8" cylinder.

CL15

The unique back design serves as back support, body side support or even abdomen support. Foot activation mechanism allows for hands-free operability.

CL23

All the benefits of the CL22's unique backrest design with a 10" cylinder (23" – 33" adjustable seat height) and an adjustable chrome footring that is easy to clean, and looks great as well.

CL14

The CL14's foot activation mechanism provides physicians with hands-free operability during surgery or office visits.

CL33

Has the same features as CL12 with a 8" cylinder (25" to 33" adjustable height). Includes height-adjusting circle ring and chrome elevated column base for added stability.

perfect for dental and doctor's offices

The Classic-Professional stools adjust perfectly for dental and doctor's offices. All the stools are user-friendly and attractive, with leather-like vinyls and fabric-like cryptons to choose from.
