

MONITOR ARM ACCESSORIES

POSITION ACCESSORIES TO KEEP YOUR FOCUS

As mobile computing and high resolution displays become more common, ideal placement of laptop and iPad® screens becomes even more critical. Often, the best screen in the office is the one on your laptop or tablet. Put them exactly where they belong — front and center — with the Workrite Laptop or iPad Holder. The Laptop Holder features adjustable side bars to allow access to side ports while keeping the laptop secure, venting for increased performance and adjustable depth to attach docking stations for a more productive work environment.

The iPad holders are available in a Quick Mount version for users on the go or a steel frame model for more secure tablet positioning. Get the full benefit of your Retina Display® by easily positioning the iPad at the ideal height for viewing or touch input.

With up to 14" depth, the Laptop Holder allows for large laptops and Docking Stations.

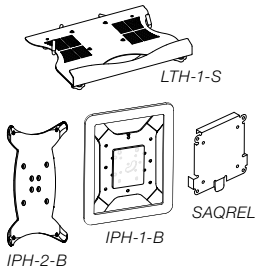

The iPad Holder mounts to the monitor arm for long-term tablet positioning.

MONITOR ARM ACCESSORIES

Products listed on this page are available through GSA Contract GS-28F-0030S SIN #711-2 (Schedule 71) except where noted

Not on GSA Contract
