THE
GOODUSE
COMPANY LIMITED

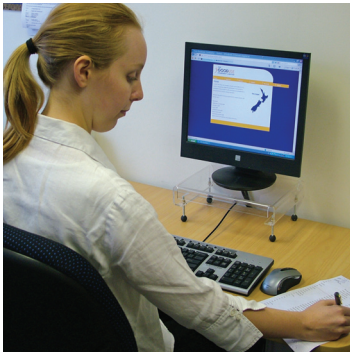

WORK SHOULD STRETCH YOU ...BUT NOT LIKE THIS

DEVELOPED BY AN EXPERIENCED PHYSIOTHERAPIST

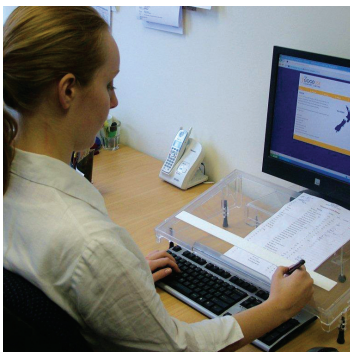

MICRODESK™ IN USE

Stretching to the left of the keyboard strains your neck, shoulder and arm.

Stretching to the right of the keyboard strains your arm and back muscles.

With a MicroDesk™ above your keyboard your papers are directly in front of you so you can read, type and write without stretching and straining.

When you're stretching and twisting at your desk you can strain your spine, neck and shoulder areas. Performing simultaneous keyboard and paperwork activities with poor body positions leads to troublesome aches and pains.

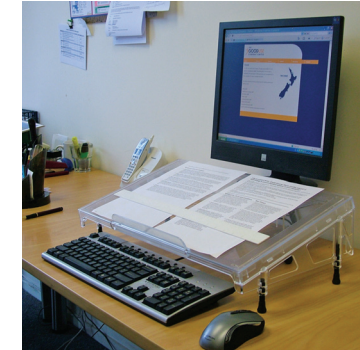

This is why physiotherapist Sarah Mahoney developed the MicroDesk™ inline writing platform.

Other benefits include:

- Continuous access to keyboard as you write
- Clear, transparent surface
- Organises your workspace
- Adjustable height and slope to fit individual needs
- Increases work comfort and decreases muscle strain
- Non slip ruler included with all models
- Paper ledge supplied in two heights; 20mm (¾") and 8mm (¼").

To find out more about the MicroDesk™ visit
