

## Non-Magnetic Carts

Ideal mobility solution for medical equipment that is operated near MRI machines and for non-corrosive applications where water and moisture can present potential issues. The universal logos displayed on the wheels clearly show the medical facility that these items are listed for usage around MRI machines.

- Soft 70-75A durometer tread constructed of a high-tech thermoplastic elastomer.
- Three shelf unit will hold 300 Lbs. of evenly distributed weight.
- Meets 3.0 Standard
- Solid riveted axle for positive wheel retention.
