

SIERRA HX ELECTRIC

RAISE THE BAR ON WORKCENTER COMFORT

The Workrite Sierra HX™ is the most innovative sit to stand workcenter for the professional workplace. The standard crossbar has been eliminated to allow maximum leg clearance. An innovative frame structure under the worksurface provides unmatched stability and room to attach a CPU holder, keyboard platform plus lots of space to position your mobile pedestal.

Sierra HX features our beautiful Silhouette Collection of worksurfaces. These sleek tops are whisper thin at just 1/2", use GREENGUARD® certified material, and are available in a variety of edge treatments.

Sierra HX Electric workcenters will lift your spirits along with your essential worktools. Quiet motors provide over 175 pounds of lifting force per leg, so no matter how heavy your workload, the Sierra HX Electric is there to support you.

3 leg workstations provide expansive space above and below the worksurface.

Exclusive electric control system features programmable settings.

LET WORK
COME TO LIFE™

Specifications:

Height range, base and leg dimensions

- 1) For added accessory installation depth, order HX Accessory Spacers, see Pricing and Specification Guide.
- 2) Metal top bracket on side of leg is 2 3/4" from the edge of the worksurface. For Peninsula and P Peninsula worksurfaces, this distance is 15" or 12" if width is 60".
- 3) For 3 leg workcenter dimensions, see the Workrite Pricing & Specification Guide.
