

Goldtouch Go!

TRAVEL KEYBOARD

Productivity through Prevention – Everywhere You Work!

Offering all the comfort and functionality of the standard Goldtouch keyboard, but in a sleeker and lightweight form factor, the Goldtouch Go! Travel Keyboard is the ONLY compact keyboard that reduces or eliminates risk factors that lead to injury.

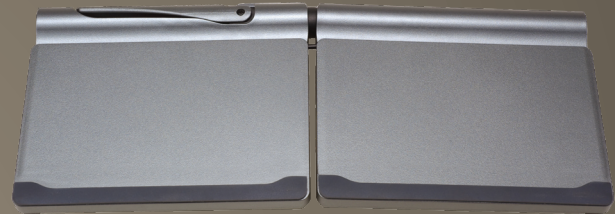

At a mere 1 lb. 1 oz., the Go! Travel Keyboard allows road warriors and mobile professionals to safely work wherever their job takes them, while enjoying all the benefits of the standard Goldtouch when away from their office workstations.

With keys approximately the size of those found on 14" notebooks, the Go! Travel Keyboard can accommodate large fingers, and offers similar key feel and travel distance as found on the standard Goldtouch. Other "mini" or "compact" keyboards have shortened key travel distance (2mm) that is too short or hard, and can cause significant pain from "bottoming out."

The compact design of the Go! Travel Keyboard makes better use of limited space environments, and allows for external mice to be placed even closer to the keyboard for reduced shoulder pain and increased comfort.

Adding to the historical durability and ruggedness of the standard Goldtouch, the Go!

Travel Keyboard comes with two protective covers that support the Go! during use while reducing exposure to impacts that could lead to key cap loss when traveling.

FEATURES AND BENEFITS

- Adjustability: 0°-30° adjustment for ulnar deviation (wrist splay) in the horizontal plan, combined with 0°-30° adjustment for wrist pronation (vertical tenting)
- Protective Removable Covers: Allows the keyboard to be placed on the notebook
- Soft key touch, low activation force and full key travel distance provides keying comfort and reduces risk from "bottoming out" when keying.
- Compact size allows for use in limited space environments, and reduces shoulder abduction when reaching for mice and other peripherals.
- Ease of use and intuitive design allow new users to adjust the keyboard to a comfortable typing position without additional accessories or attachments.
- Compatible with PC and Mac

SPECIFICATIONS

Activation Key Force: 39g-42g average
Travel Distance: 3.2mm, +/- .5mm
Weight: 1lb. 1 oz.
Dimensions: 13.25" x 6" x 1" (at highest point)
