

The Goldtouch Go!

WIRELESS BLUETOOTH TRAVEL KEYBOARD

Portable Comfort Everywhere You Work!

Imagine having the convenience of a wireless keyboard, and the comfort of individualized fit, anywhere you go, no matter what mobile device you use. That's the luxury provided by the Goldtouch Go! Wireless Bluetooth Travel Keyboard. Weighing in at 1 lb., this lightweight travel companion is an easy to use accessory that makes working on your computer feel like typing paradise.

The Go! Bluetooth Keyboard is the perfect companion for the Apple iPad®.

Goldtouch has revolutionized the usability and comfort for iPad® users who want to increase productivity and enjoy a more natural typing position. Let's face it, in this wonderful world of amazing technology, mobile & tablet users rely on portable devices with touchscreen keyboards; but an LCD touchscreen is simply not practical or comfortable for performing long and complete typing tasks.

The Go! Bluetooth keyboard, when paired to your iPad® or other Bluetooth mobile device, allows you to work faster, make fewer errors, complete tasks in comfort. The Go! Bluetooth Keyboard is the ideal solution for mobile users looking for a more natural typing experience. The Goldtouch Go! Bluetooth Keyboard offers you a customized comfortable keyboarding experience that you just can't beat.

The Goldtouch Go! Wireless Keyboard is the key to a superior typing experience.

Our keys are what set us apart. The Goldtouch Go! Keyboard gives users a soft key pressure and key travel distance that's typically only found on a standard keyboard. Combined with our signature adjustable design, which allows you to customize the keyboard to straighten your hands and wrists and release the pressure and tension on your tendons and joints... We're positive this is one travel keyboard that will revolutionize your mobile lifestyle.

Key Features:

- Go! Keyboard Signature Adjustability: 0-30° adjustment on the horizontal plane (wrist splay) to straighten your wrists, combined with 0-30° adjustment on the vertical plane (tenting) to reduce wrist and arm tension.
- Protective Removable Covers: Allows for convenient storage. (The non-slip covers also allow you to place the keyboard directly onto your laptop in confined areas).
- Bluetooth support means there are no wires to deal with, just pair your Go! with your mobile device one time, and it will automatically connect whenever you turn it on again.
- Easily switch between Windows PC operating systems and mobile devices to Mac, iPad, and iPhone operating systems through a simple key command.
- The Go! Keyboards compact size allows for use in limited space environments, and weighs 1 lb. for convenient portability.
- The Go! Keyboard features an extra long battery life; you'll only need to charge your keyboard every 2-3 weeks depending on use.
- Operating distance of 32 feet (please note, this may vary depending on the receiving sensitivity of Bluetooth dongle on the host system.)
