## DSX750

Media Player Holder Accessory
For 32" to 60" displays*

Quickly, securely and inconspicuously house a media player control device behind a wall-mounted display with Peerless' DSX750 Media Player Storage Accessory. Compatible with a number of Peerless swivel and articulating wall mounts, or can be used as a stand-alone flat wall mount, this media equipment enclosure eliminates the problems associated with securing the media device with tape or straps behind the display or installing it remotely in a wiring closet. It also offers built-in cable management, security and prop-open service access features critical for easy maintenance of digital signage applications. A special arm within the DSX750 enables the unit to prop open for easy servicing of the media player or display without taking down the screen or disassembling the mount. This accessory box fits snugly between the display and the mounting plate, enabling the media player and display to be tightly coupled for a neat appearance as well as one-stop installation and access.

* Note: Maximum display size is contingent upon attached mount maximum weight. Contact your Peerless Customer Care Representative for specific model maximum load capacity.

TV size: 32"-60"*

FEATURES

■ Houses media control devices behind the display within an enclosure (storage space up to: 9.5" x 7.75" x 2.5")
