

# AnthroBench II

Truly the heavyweight champion, AnthroBench II holds large equipment effortlessly. Ideal for labs, control rooms and manufacturing floors, AnthroBench II is both functional and aesthetically pleasing. This sturdy work bench holds 400 lbs., and its shelves can install at 1" increments along the legs so you can place your worksurface and equipment at whatever height fits your needs.

The 72" wide AnthroBench II can hold even the heaviest lab equipment – up to 400 lbs.!

Integrated cable management makes cord organization a cinch. Route cords through the cable channels inside the hollow legs and conceal them with side covers.

The smooth, rounded Comfort Edge™ on the front surface is both elegant and ergonomic. Your forearms can relax comfortably without an annoying square edge to bite them.

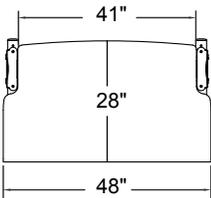

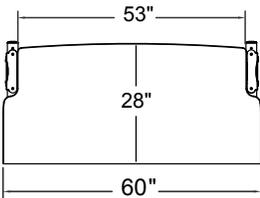

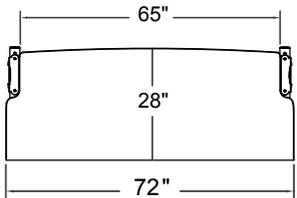

Outfit your AnthroBench with additional shelves, legs extensions for added height, and storage options to hold everything.

Make your AnthroBench mobile with optional 5" casters (sold separately). The single-wheel casters have soft rubber thread that moves smoothly over rough surfaces. Comes in set of 4 (two locking and two non-locking).
