Daisy Chain Power System, Rigid Modesty Panel

Verify that you have all the tools needed for the assembly

#2 tip Phillips screwdriver over 6"
long or drill/driver with extension
⅜" wrench if needed for Hex Nut (E)

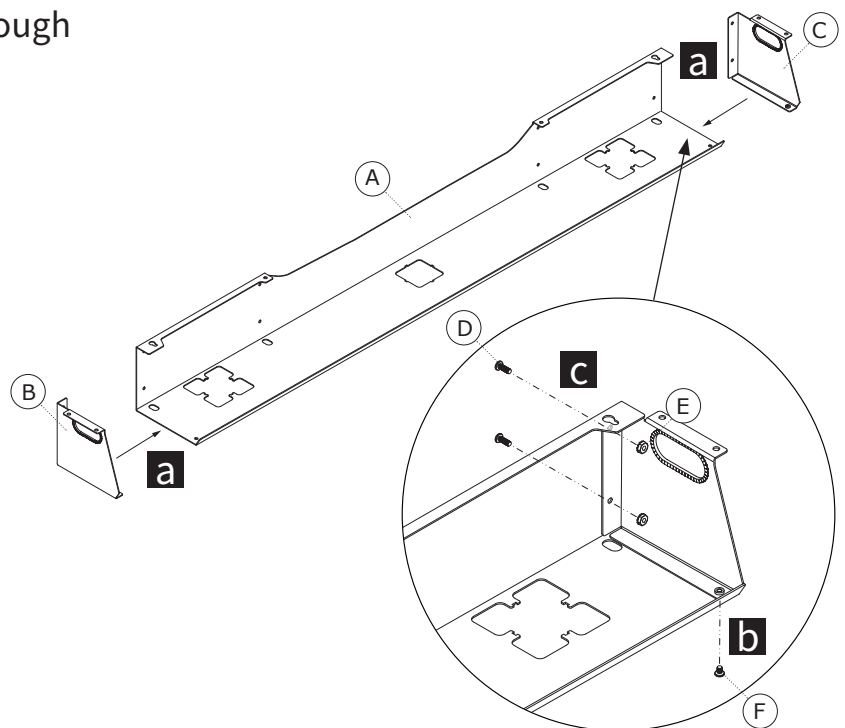

1 Attach Trough Ends to Cable Trough

- a** Slide Trough Ends (B & C) onto Cable Trough (A).
- b** Attach from below using #10-32 × ¼" Pan Head Machine Screws (F). Repeat for other side.

If Installing optional Rigid Modesty Panel, skip to **Step 2**.

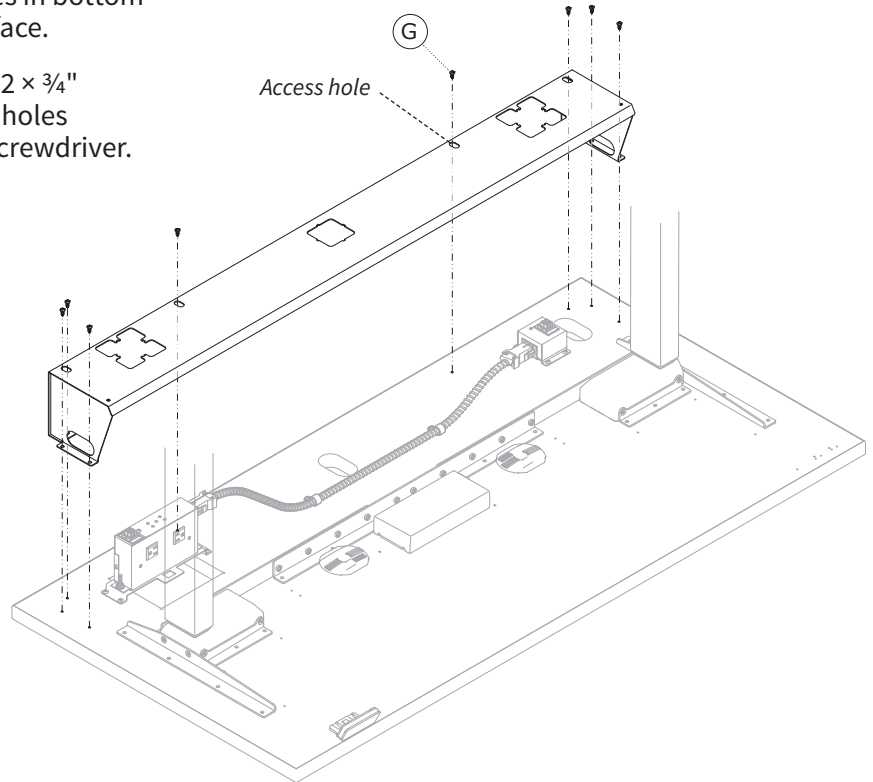

- c** Attach from behind Trough using the #10-32 × ½" Pan Head Machine Screws (D) and the #10-32 Hex Nuts (E). Repeat for other side.

Trough only installation

2 Attach Cable Trough to Underside of Worksurface

- a** Align holes in Cable Trough with holes in bottom of your Workrite pre-drilled worksurface.
- b** Attach Trough assembly using the #12 × ¾" Phillips Pan Head Screws (G). Access holes provide easy attachment with long screwdriver.

Under Benching Worksurface with optional Rigid Modesty Panel & Daisy Chain Power System

3 Attach Trough Ends to Cable Trough With Optional Rigid Modesty Panel

Skip this step unless you've purchased the Rigid Modesty Panel **ACC-MODPNL-XX-B3**

Attach Trough (A) to the threaded inserts on the Rigid Modesty Panel from inside Trough using the eight #10-32 × ½" Pan Head Machine Screws (D).
