

# How To?

## How to replace EZ back height adjustment mechanism (device)

MODEL: 7877,7878,7898,7899,7998,7999  
IU54,IU55,IU58  
PT72, PT74, PT76, PT78, PT79  
WH84,WH88,WH89

### Problem:

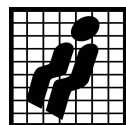

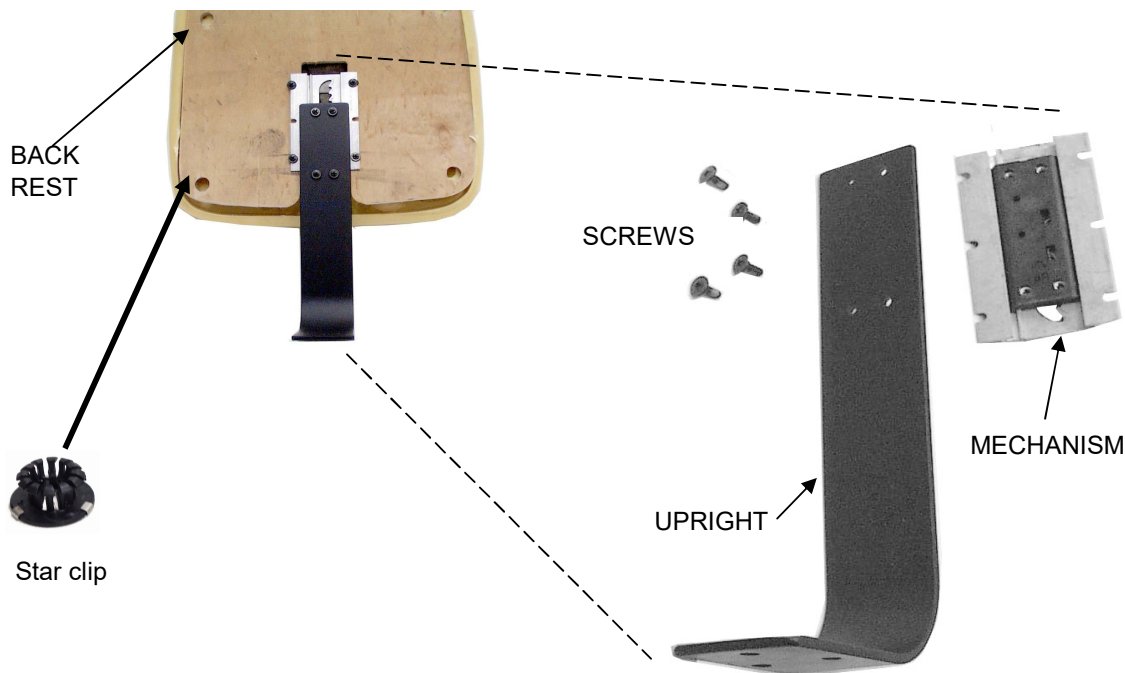

Backrest would not move up or down.  
Backrest is separated from upright.  
Backrest won't stay at desired height.

### Solution:

(A) Tool needed: A Philips screw driver.

(B) Steps:

1. Remove backshell by prying open around the corners using screw driver.
2. Loosen screws to remove back height adjustment mechanism from upright.
3. Loosen screws to detach bad mechanism from back wood.
4. Re-install new back height adjustment mechanism onto Back Wood.  
(Some models have spacers which need to be re-install as well.)
5. Re-install backrest to upright.
6. Test height adjustment function.
7. Re-install backshell onto backrest using new star clips.
