Mounting Height for Ergonomic Workstation

This mounting height is a recommendation for an ergonomic workstation that accommodates user heights of 5'9"- 5' 11"
 If user heights are different than this, you should change mounting height to accommodate user heights.
 (Change mounting height one inch for every one inch difference in user heights).

Mounting height assumes there is a 6" (152 mm) distance between the center of your monitor mounting holes and the top of the screen. If your distance is smaller, you should increase mounting height accordingly, if your distance is larger, you should decrease your mounting height accordingly.
