

efloat *GO*

Humanscale®

Our most functionally versatile yet cost-effective height-adjustable table to date,

eFloat *GO* is the quintessential sit/stand solution for both home and commercial interiors.

With innovative anti-collision technology, quiet motors, and programmable hand switch, eFloat *GO* encourages users to be active by allowing them to seamlessly adjust positions through the day without disrupting workflow.

eFloat *GO* is available in two- and three-leg configurations with two height adjustment range options to accommodate a wide array of users. Both configurations are compatible with Humanscale's NeatTech cable management system and have an optional beamless design to accommodate a keyboard tray. And unlike most height-adjustable tables that require time-consuming hands-on installations, eFloat *GO* utilizes an innovative frame that assembles in under 5 minutes.

Key Features

- Expandable frame accommodates worksurfaces from 48" – 84"
- Programmable digital hand switch with USB Port adjusts at a simple touch of a button and stores preferred height options
- Accelerometer anti-collision technology prevents table from colliding with objects as it vertically adjusts
- Quiet motor in each leg for near silent adjustment
- Worksurface options (sold separately): Bamboo, Birch Veneer, Walnut Veneer, White Oak Veneer, White Laminate, Black Laminate, Grey Laminate, Platinum Laminate
- Frame Colors: Black, Silver, White
- Warranty: 10 Years, 24/7
