AKB-150UB-TAA

Desktop Ergonomic Keyboard (TAA Compliant)

The AKB-150UB-TAA - a TAA Compliant input device designed for GSA sales to government agencies, the military, their suppliers and vendors, and other organizations requiring end products manufactured to U.S. Trade Agreement Act Specifications.

Ergonomic Shape

Integrated Palm Rest

Split Key Design

Multimedia and Internet Controls

Ergonomic Shape

The ergonomic design of this keyboard along with its gently curved shape encourages natural typing positions for maximum comfort during long use.

Integrated Palm Rest

The integrated palm rest positions your hands at a natural resting position. This helps relieve joint and back pain, spinal discomfort, and improves typing posture.

Keyboard Split Key Design

Standard keyboards force your hands to be close to each other while split key keyboards create a wider distance between your hands. This distance helps alleviate strains on the neck and back that would otherwise build up using standard keyboards.

Keyboard Specifications:
