

# Touch & Balance Full-Size

Product brochure

# Contour

**Balance Full-Size and Contour Touch work in perfect tandem to ease shoulder pain and enhance daily performance.**

## **MAXIMUM PAIN RELIEF WHILE YOU'RE WORKING**

Balance Full-Size is not only ergonomically enhanced - it's the perfect partner to Contour Touch.

## **FAMILIAR, HIGH-PERFORMANCE INTERACTION**

The high-resolution glass touchpad has a smooth surface for precise, effortless finger movements.

## **ADVANCED PRODUCTIVITY**

There is native support for the usual Windows finger commands - scroll, zoom, back and forward navigation to keep you productive while on your computer.

## Centered work

### 01 **Less reaching. Less strain.**

Keep your hands where they belong – right in front of you. From your fingertips to your forearms, a centered posture reduces tension and fatigue, helping you stay comfortable through long days at your desk.

You eliminate the awkward side-reaching, twisting or stretching that comes with standard mice.

### 02 **Comfort that lasts.**

A centered posture reduces tension and fatigue, helping you stay comfortable through long days at your desk. That means less strain, more energy, and better focus all day long.

By keeping your posture aligned, you reduce the risk of repetitive strain injuries and can feel the difference, long after you log off.

### 03 **Faster flow, fewer interruptions.**

With everything in front of you, switching between typing and navigating is seamless. No wasted movements. No broken focus. Just smooth, natural transitions that keep you in your flow – and help you get more done with less effort.

When your setup supports both your body and your brain, work feels smoother, sharper, and more satisfying.

### 04 **Work with a familiar Touch.**

Skip the heavy learning curve. Touch gives you the smooth, intuitive experience of a built-in touchpad – with the added benefit of a centered posture that helps ease tension and bring release to tired shoulders.

No manuals, no overthinking – just plug in and get to work. It's everything you know in a "better for your body" design.

## Swipe, type, touch, or tap? You pick!

Touch lets you use all your favorite multi-touch gestures straight out of the box - no learning curve.

Our most eco-friendly combo to date

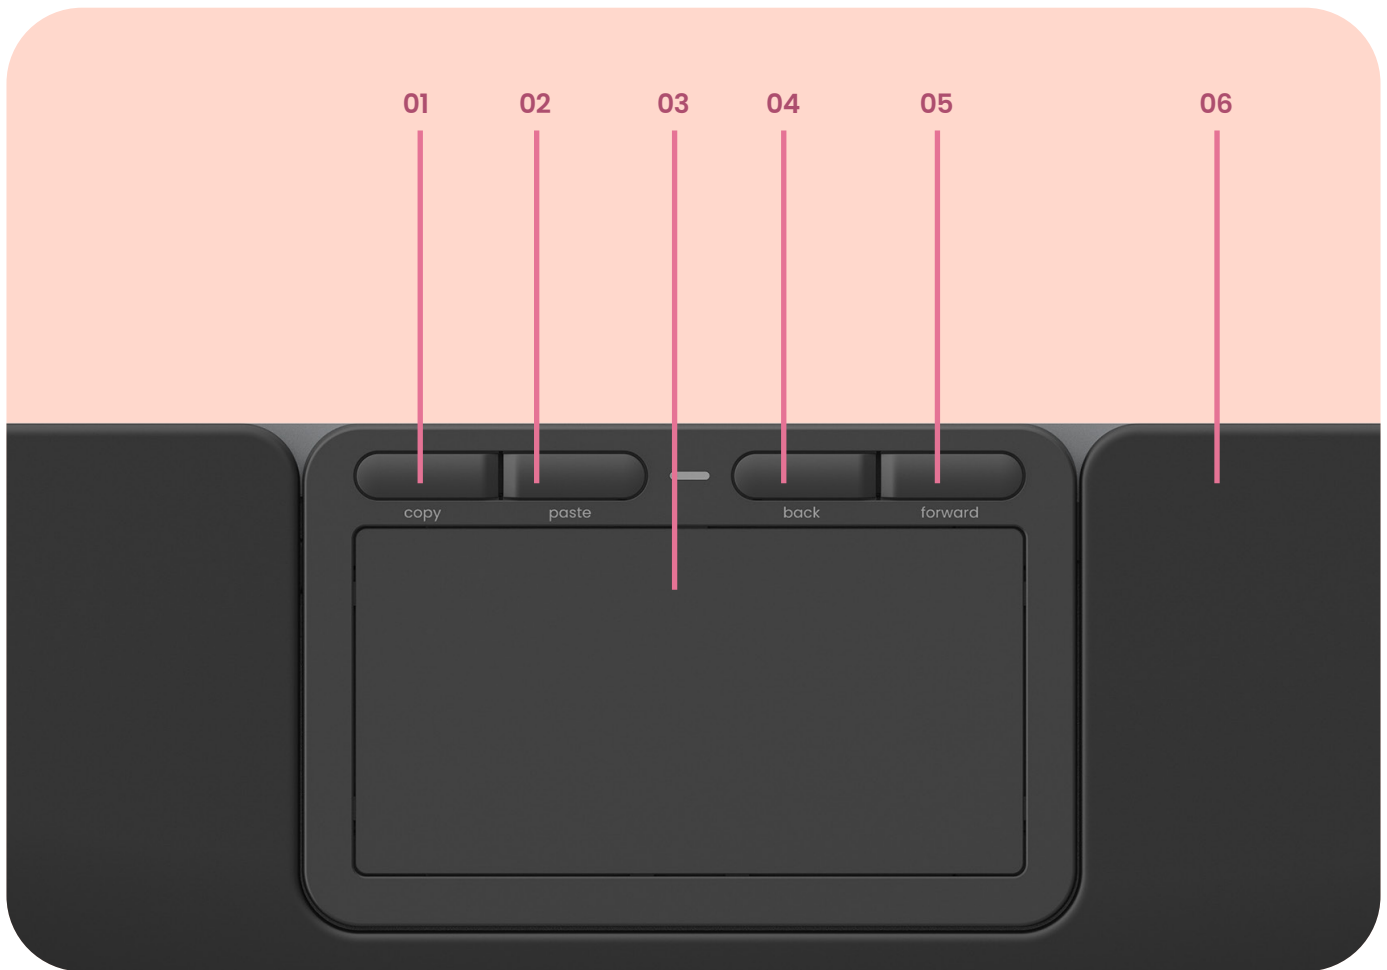

**Snap Balance Keyboard and your Contour Touch into place** with SnapLinks to enjoy a stable, streamlined setup that reduces the strain of reaching for a standard mouse.

Scratch-free glass  
Ultra-responsive touchpad  
Click anywhere
