

# Peapod Mini Keyboard

The Peapod is built for mobility first. Its folding design slips easily into a bag, then opens into a comfortable, split-style layout when you are ready to work. It connects over Bluetooth 5.1 and supports iOS, Android, and Windows, making it a natural companion for tablets and phones as well as laptops. With dedicated system switching shortcuts and a fast wake-up from any key, it keeps your workflow moving even when you are working from a café, a client site, or a plane tray table.

## Specs
