

# Goldtouch V2 Adjustable Keyboard Key Messaging

The Goldtouch V2 Adjustable Keyboard is pure comfort in a box, and we'd like our messaging to reflect that. In an effort to simplify our products here are a few key points that we think really define our V2 Keyboard:

## COMFORT

We're serious about finding the right comfort fit for each individual person. Since no two people are built exactly alike, we designed our keyboard to adjust to fit the needs of every user.

The Goldtouch V2 is the only keyboard that offers a custom comfortable fit for your entire workforce, including that of a traditional flat keyboard, or a more dynamic comfort position. The V2 puts your wrists, arms, shoulders and back in a neutral position to help reduce your risk of injury and ensure that you're typing in pure comfort.

## ADJUSTABILITY

We knew that the level of comfort we were looking for, could not be achieved in a one size fits all approach. The V2 individually adapts to each user to ensure their best fit through our patented lever locking design. This allows for a full range of adjustability in both the horizontal and vertical planes.

## INTUITIVE

The Goldtouch keyboard dynamically adjusts to your ideal comfort position and can be changed at anytime based on your preferences. The V2 can also be used in a traditional flat layout if desired.

## SOFT KEY TOUCH/OPTIMAL TRAVEL DISTANCE

The Goldtouch V2 has the softest keys on the market, with an activation force of only 40-45g compared to the standard 55-60g to provide keying comfort and reduce the risk of "bottoming out."

## PLUG AND PLAY

Our easy to use plug and play technology is compatible with PC & Mac computers, and requires zero driver installation. (Compatible with Windows 7, Vista, XP, 2000, and Mac OS 10.4 and newer.)

## INCREASED PRODUCTIVITY

Our extra soft key touch and optimal key travel distance help reduce the amount of effort you exert when you type. For someone that spends 40 hours a week keying, we're giving you a 30% reduction in typing pressure and force.

## LOWER HEALTH CARE COSTS

After extensive independent market research the Goldtouch Keyboard has shown a 60% reduction in direct workers compensation costs associated with Repetitive Stress Injuries (RSI's). The V2 is a keyboard that helps to keep your employees happy and healthy in their work space.
