STEP 2: Attach Arm to Base Stem

1. Insert arm (2) onto tube (4).

2. Tighten knob and make sure the screws are tightly locked before attaching monitor.

1 Use hex key (H) to adjust collar screw.

2 ⚠ Caution
Make sure the screw here is tightly locked before hanging up monitor.
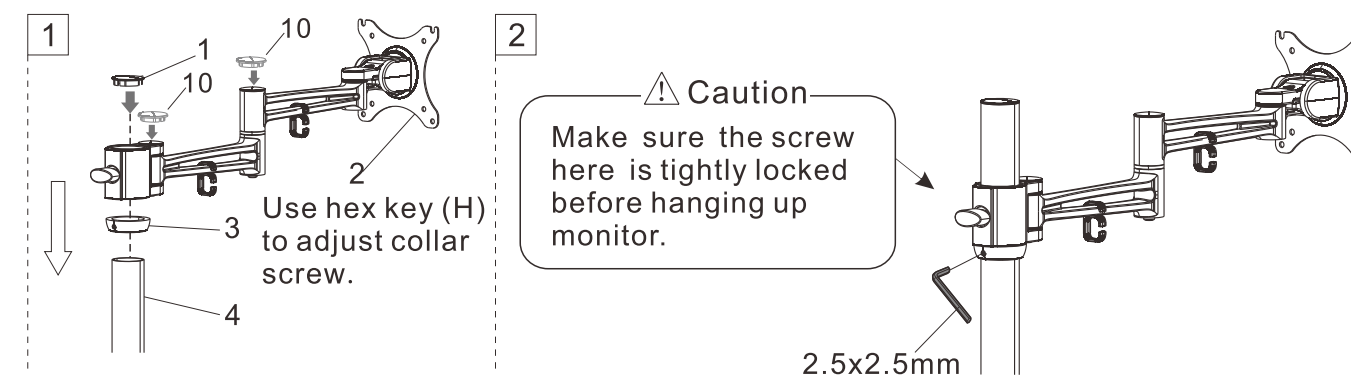

2.5x2.5mm

1. Select appropriate screws (A/B)-depending on monitor hole size and add washers (E) to them.

2. Attach monitor to arm using the screws (A/B).

2a. For holes in 100mm x 100mm VESA spacing, attach top screws to monitor first and set monitor into top grooves of monitor plate.

2b. Then add bottom screws through monitor plate and securely tighten all four screws.

Note: For holes with 75mmx75mm VESA spacing, attach all four screws through monitor plate and tighten securely

● Make sure these instructions are read and completely understood before attempting installation. If you are unsure of any part of this installation, please contact a professional installer for assistance.
● The desk or mounting surface must be capable of supporting the combined weight of the mount and the monitor, otherwise the structure must be reinforced.
● Proper tools must be used. A minimum of two people are required for this installation. Failure to install properly can result in property damage or serious injury.
● Check joint parts every two months, making sure the screws have not loosened.

This product was designed to be installed on a desk. Before installing, make sure the mount will support the combined load of the equipment and hardware. Never exceed the maximum load capacity 22 lbs (10 kg), or else it may result in product failure or personal injury.

Note: This product is intended for indoor use only. Use of this product outdoors could lead to product failure or personal injury.
