

 **MouseTrapper**  
flexible

# Feel better

What is Moustrapper?

Moustrapper is an ergonomic computer mouse which, through its design and functions, can assist in relieving and preventing repetitive strains in shoulders, neck and arms. Moustrapper is an alternative to the traditional computer mouse and is available in several models and designs. The product is developed and manufactured in Sweden.

What does Moustrapper do for you?

Moustrapper will assist you in having a good ergonomic working posture with your arms centered in front of your body, which in turn will facilitate working with both hands and all fingers on the mousing pad.

What is Moustrapper Flexible?

Our latest addition to the Moustrapper family - small, lightweight, portable and wireless.

## Moustrapper flexible

- Nine programmable buttons
- Large control pad with click and improved scroll function
- Wireless connection via USB with long battery time
- Portable – only 295 grams
- Available in choice of black or white
- Resolution 1500 dpi
- Range 10 meters

You can configure the functions of the buttons yourself. To do this you need to download a free program called MT Keys from [www.moustrapper.com](http://www.moustrapper.com)
